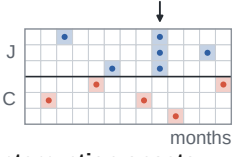
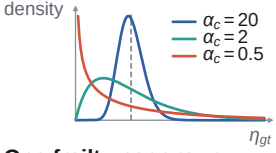
1 Streams and groups



Interruption onsets

streams × months, by origin

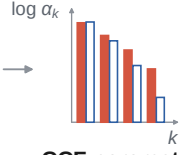
2 Common-cause frailty



One frailty per group

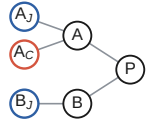
$\lambda_{it} = R_{it}\,\xi_{it}\,\eta_{g(i)t}$, Var $\eta = 1/\alpha_c$

3 What follows



CCF parameters

one α_c sets every α_k



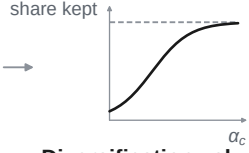
System reliability

$h(p) + \sum$ JRI · cov

Identification

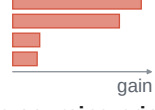
the common cause is seen in pairs

4 Decisions



Diversification value

protection kept: $\alpha_c/(1+\alpha_c)$



Re-sourcing priority

where to add a source first
