Stage 1 Data
Trade records
UN Comtrade; holiday calendar
Streams and onsets
flow falls below half its median
Stage 2 Structure
Common-cause groups
origins with ≥ 5 streams
Supply structure
inputs, sources, shares → φ
Stage 3 Inference
Estimation
profile likelihood (12); covariates
Identification and pattern
pair rule (13); co-onset pattern
Stage 4 System decisions
Reliability and importance
exact (7) or pairwise (10); I_g, Δ_i
Decision outputs
ranges over α_c; bands; ranking
